Free Land for Taliban

By [Dawar Naqvi](#) • Aug 1st, 2008 •

Most of the people in Karachi belong to middle class or lower class family. They earned average or lower than average salary. Only three percent of population comes under rich class. When I said People of Karachi, it meant people who were born in Karachi and contained only Karachi Domicile. They live in Karachi only. In this average or lower class system civilization, one generation sacrifices for their new generation.

This is a trend. They worked hard to earn money to send their kids in good schools where they never had chance to go. These circumstances transfer generation to generation. This is not easy to explain in two lines. If they do not have house, they work hard to sum up their savings to buy plots. Next generation build the houses. It takes years to sum up enough money to buy a plot.

Averagely it takes 30 to 40 years for a person in middle class to sum up money to buy a reasonable plot or house. This is the story of citizens of Karachi. On the other hand Taliban came from other part of country and also from our neighbor country, Afghanistan to live in Karachi. The very first thing they do is it to go to any Karachi abadi and occupy the space for their houses and start living there. Many Kachi Abadies are the examples.

They think earth is the land of ALLAH and human can live any where they want. This kind of illegal occupation also created many other problems. If they need water they just take the illegal line connection from close neighborhood. This is one of the reasons of water shortage. They do some tricks for electricity and causes power shortage.

Every one knows in 1980, during the Afghan war Kila Sinkof and drugs culture was introduced by Jihadis in Karachi. Past Jihadies are today's Taliban. Recently Pakistan Army and Nato forces are doing operation in northern part of Pakistan and also on Afghan border. As a result big quantity of Taliba forces move to Karachi again. I strongly urged President of Pakistan, Prime Minister of Pakistan and all other responsible people to take ultimate steps to stop this Talibanization.
